

Joshua Jumbo

Product Designer

W: joshuajumbo.com

L: Nigeria

E: jumbojoshuaj91@gmail.com

Designing meaningful products has always appealed to me for as long as I can remember. I have 2+ years in **UI/UX Design** and have been designing for startups that make you engage deeply in **user research, user interface, and experience design**. My experiences in UI/UX have helped me grow skills like **interaction design, user research - both quantitative and qualitative and micro-interaction** skills. I love to take on complex problems and help find simple solutions to them.

Work History

○ **UI/UX Designer**

August 2020 - Present

1 yrs 3 mos

DPhi.tech

- I helped increase community engagement by 5x what it used to be prior to me joining DPhi.

I did this via:

- Designs of the landing pages of the community platform and also the landing pages of the business platform to capture our various features and benefits for the right users
- Design of several feature pages for our sub-products
- Contributions to the assessment platform for hiring
- Contributions to several sub-platform designs for different users within the educational niche.
- Contributions to competitive analysis research

○ **UI/UX Designer**

January 2020 -

January 2021 to

Malon Technologies

May 2020

&

March 2021

4 mos

3 Mos

January 2020 to May 2020 (4 Mos)

- Conducted user research both quantitative and qualitative to get better information about the direction of the PRD shared for the product called churchvest

Developed the user persona, empathy map, affinity diagram, information architecture, user journey map to give the stakeholders, myself and the users we tested on, the quick overview of the product pathway and goals

Developed the dashboard, landing pages and respective mobile applications for the product

January 2021 to March 2021 (3 Mos)

- Conducted surveys for a new product called Hey Nigeria.

Deconstructed the findings into user person, user journey map, affinity diagram, information architecture and low-fidelity design to give the product owner a simpler product from the initial complex idea.

Designed the high-fidelity mobile application and the web dashboard for the product.

Completed the hand-off process to the engineers with appropriate design documentation, style guide inclusive and prototype where necessary.

○ **UI/UX Design Intern**

April 2019 - August 2019

4 mos

Amplify.ng

- Worked in a team of 3 designers and an engineer to create simple products for clients of the agency while learning on the job the basics of UI/UX design.

○ **Personal Assistant + UI/UX Designer**

November 2018 - March 2019

4 mos

Softcity Group

- Worked in a team of 3 designers and an engineer to create simple products for clients of the agency while learning on the job the basics of UI/UX design.

Side Projects

Churchvest 2.0

- I had a need to take on Churchvest 2.0 after completing my nanodegree program at udacity.

The organization didn't prompt me but I felt there was a need to upgrade the platform. So I worked on the Churchvest platform again, making the design more appealing and solving ux cases that existing users had identified with the live platform.

CholT

- I worked on this project as part of the criteria for bagging my nanodegree certification.

The idea was a challenge I had personally faced, doing chores.

I consider myself to be lazy in this aspect, I love to leverage resources to get my menial works done.

So I thought Gen-z and millennials were in semblance to my thoughts.

To buttress my hypothesis, I took on qualitative research (remote moderated).

I called close by friends who passed the criteria I had set for the type of users I would work for, and after 10 calls, I came to a conclusion that my hypothesis was eventually justified.

So I thought Gen-z and millennials were in semblance to my thoughts.

To buttress my hypothesis, I took on qualitative research (remote moderated).

I called close by friends who passed the criteria I had set for the type of users I would work for, and after 10 calls, I came to a conclusion that my hypothesis was eventually justified,

Micro-Illustration

I wanted to take the concept of remote work during pandemic times and make it visible to recruiters, so I made a quick illustration.

Education

University Of Uyo

January 2012 - April 2017

- Bachelor Of Computer

Certifications & Awards

Udacity Nanodegree

2021

MCP In Big Data Engineering

2018
