EXPERIENCE

DPhi, Belgium, Remote—Product Designer

April 2020 - PRESENT

Redesigned the major and micro platforms within DPhi and within a team of 2 UI designers and a part-time UX designer who was working for Google at the time. The redesign was to ensure the Company portrays its vision and brand globally as it is represented internally.

Helped in moving the Community of DPhi from 1x members to 3x members currently with better ux flows than it was.

Contributed in creating quick MVPs for a wide portfolio of similar but necessary stand-alone products.

Malon Global Technologies, Lagos, Remote — Contractor UI/UX Designer

January 2020 - May 2020

Conducted user research both quantitative and

CERTIFICATIONS

Udacity Nanodegree in Product Design

Am currently enrolled in the product design course on udacity and would be wrapping up this september

qualitative to get better information about the direction of the PRD shared for the product called churchvest

Developed the user persona, empathy map, affinity diagram, information architecture, user journey map to give the stakeholders, myself and the users we tested on, the quick overview of the product pathway and goals

Developed the dashboard, landing pages and respective mobile applications for the product.

January 2021 to March 2021

Conducted surveys for a new product called Hey Nigeria.

Deconstructed the findings into user person, user journey map, affinity diagram, information architecture and low-fidelity design to give the product owner a simpler product from the initial complex idea.

Designed the high-fidelity mobile application and the web dashboard for the product.

Completed the hand-off process to the engineers with appropriate design documentation, style guide inclusive and prototype where necessary.

Amplify.ng, Lagos, Nigeria —UI/UX Design Intern

April 2019 - August 2019

Worked in a team of 3 designers and an engineer to create

Interaction Design Foundation

I am a member of the interaction design foundation platform and I have completed a couple of courses on it. For example: *Fundamentals in design thinking*

MCP in Big Data Engineering

During my time at Microsoft, I completed this and was certified.

LANGUAGES

English

simple products for clients of the agency while learning on the job the basics of ui/ux design.

Softcity Group, Lagos, Nigeria —P.A to the CEO

November 2018 - March 2019

After my time at Microsoft4Afrika, I didn't want to continue as a data engineer. So while waiting for an opportunity in design, Softcity came along with a promise to slowly transition me from helping the CEO with meeting schedules and contract drafts to a product designer. So I worked in several roles, from being in touch with the developers, the marketers, the administrators, representing at meetings and more.

Fortunately, I left for my next company because the promise of my transition never bore fruit.

However, I helped the organization win a huge contract at a meeting I was assigned the responsibility of.

Microsoft4Afrika, Lagos, Nigeria —Graduate Trainee in Big Data Engineering

February 2018 - August 2018

I was just out of school and this was my first job as a graduate, so I was recruited to learn about big data engineering. Eventually, after 2 months I began to migrate on-premise data to the cloud (azure).

EDUCATION

University of Uyo, Uyo, Nigeria — *B.Eng In Computer Engineering*

January 2012 - April 2017

I graduated with a second class honors. Asides being a top graduate, I also led my department in my final year as the president.

Univelcity, Yaba, Lagos — Course in *product Design*

March 2020 - May 2020

I attended classes on the weekend to hone my craft in product design at the univelcity institute.

PROJECTS

Temporarily my project can be found here:
